- Flutter
- Dart
- Java XML

Desktop Development
- JavaFX
- VB.NET
- Delphi

Database Technologies
- SQL
- MySQL
- Firebase

Git
- github

API'S
- Postman

Networking
- Cisco Packet Tracer

Tools
- AI Tools

Cyber
- Basics Kali Linux
- Basics Metasploit

COURSES

Eta Coding Libya 2025

Flutter Mobile Development Course

Acquired hands-on experience in building mobile applications using Dart & Flutter

Key topics covered :

- Environment setup and first project structure.
- UI design and state management.
- Lists, dynamic components, and navigation between screens.
- API integration and data handling.
- Customization, optimization, and user experience improvement.
- Completed a fully functional mobile application as a final project.

PROJECTS

Tog Mobile Application - Graduation Project 2026

A mobile application developed to display and sell products for Tog Company. The application provides a simple and user-friendly platform that allows customers to browse products, view details, and manage their orders online.

Key Features:

- User authentication (Sign up / Login).
- Product browsing with images and detailed descriptions.
- Shopping cart for managing product orders.
- Favorites (Wishlist) to save preferred products.
- Clean and user-friendly interface.

Technologies & Tools Used:

- Flutter & Dart
- Firebase (Authentication / Firestore).
- REST API Integration.
- Image Hosting using ImgBB.
- Git & GitHub.
- Figma (UI Design).
